RE: Transfer of Property Interest in the 12th Street Landfill
Notice Requirements under Section 20116 of the Michigan Natural Resources
and Environmental Protection Act (NREPA)

Dear Sir or Madam:

With reference to the transfer of Plainwell, Inc.'s property interest in the 12th Street Landfill, Kalamazoo Superfund Site, Michigan, we are required under Michigan law to inform you that this site contains PCB-contaminated materials. This letter is to inform you that the 12th Street Landfill is a "facility" as defined by Section 2010 of the Michigan Natural Resources and Environmental Protection Act (NREPA). A "facility" means an area, place, or property where hazardous substance exists at concentrations that exceed clean-up criteria for unrestricted residential use. Section 20116 of the NREPA requires a person who has knowledge or information that a property is a "facility" must disclose the general nature and extent of the release of the property to any potential buyers.

The 12th Street Landfill was historically used as a landfill for waste and residuals associated with the manufacturing and recycling of paper. These wastes contained significant amounts of polychlorinated biphenyls (PCBs). Historically, releases of sediment from the landfill have caused the spread of PCB contaminated materials into the Kalamazoo River. In 1990, the 12th Street Landfill was included in the Portage Creek/Kalamazoo River Superfund Site and was placed on the National Priorities List (NPL). On September 28, 2001, the Michigan Department of Environmental Quality (MDEQ) and the United States Environmental Protection Agency (U. S. EPA) issued a Record of Decision (ROD) for the 12th Street Landfill site. Response activities required in the ROD to assure the protection of public health, safety and welfare, and the environment and to ensure the integrity of the remedy included, but were not limited to, the construction of the landfill cap and containment system to contain paper residuals and soils and sediments contaminated with PCBs and to prevent erosion of PCB-contaminated materials into the Kalamazoo River; construction and maintenance of a fence; construction, operation, and maintenance of groundwater monitoring system; and establishment of land use restrictions.

Subsequently, on April 23, 2004, Plainwell, Inc. recorded a Declaration of Restrictive Covenant in Liber 2662 at Page 618 in the Allegan County records for the 12th Street Landfill and on March 25, 2005 Plainwell, Inc. recorded a Declaration of Restrictive Covenants and Environmental Protection Easement in Liber 2811 at Page 584 in the Allegan County records for the 12th Street Landfill (together the "Restrictive Covenants and Easement"). The Restrictive Covenants and Easement are enclosed. The Restrictive Covenants and Easement limit the use of the 12th Street Landfill site to industrial use and contain specific restrictions barring use of this property for various purposes, for example as a school or hospital. The Restrictive Covenants and Easement prohibits any excavation, drilling, penetration or other disturbance of the surface or subsoils on the property except as necessitated for compliance with the O&M plan or conducted in accordance with any work plan approved or modified by U.S. EPA with MDEQ concurrence. The Restrictive Covenants and Easement also prevent construction of buildings on the property unless the plans are submitted to MDEQ and U. S. EPA. As the new owner of this facility, you are required to comply with the requirements of Restrictive Covenants and Easement and any applicable requirements of Section 20107a of the NREPA and R299.51001 et seq. of Michigan Administrative Code (a.k.a. Part 10 of Part 201).

As is required by the Restrictive Covenants and Easement, Plainwell has provided notice to the U.S. EPA and MDEQ of our intent to transfer our interest in the 12th Street landfill to Weyerhaeuser.

Please contact me if you have any questions.

Very truly yours,

GODFREY & KAHN, S.C.

John L. Clancy
